

# ANARCHIST BLACK CROSS

What is ABC?

**Anarchist black cross (ABC) is an initiative that helps anti-authority thinking people who got in conflict with a state machinery for political activities.** Maybe people who are arrested, in prison, in a law suit or another difficult situation. One of the main goals of this activity is to support them with finance and legal aid.

Another activities of ABC are collection of information about different causes here in Czech and everywhere in the world, spreading the information, visiting prisoners and psychical or material support as well as sending protest emails, letters, solidarity actions and demonstrations is also part of the ABC activity.

Costs for advocacy of the accused activists are extremely high. ABC is an anarchists initiative, so it does not receive money from grants or non-governmental organizations. The main source of money is ourselves.

It is very important to notify, that also you can need help one day! Our weapon is solidarity! You can find further information about project, how to cooperate, support or other news on our web page: **[anarchistblackcross.cz](http://anarchistblackcross.cz)**

## Situation in Czech republic

Different organizations have their own funds for its needs, but we felt, that there is a kind of public and transparent ABC group missing, which will support all people without difference. This kind of ABC group will protect all of the movement and cooperate with similar organizations abroad.

After the brutal eviction of last pragues squat Milada (end of summer 2009), which under protection of police has been done by a security mainly based on nazis, we decided to act. We felt the need to unite and to insure self and our close.

Another impuls to unite argerinci groupdents on Albertov in September 2009. The police ancompromising broke up the peacefull demonstration which supported people who showed by direct action the unlogic of "flat politics" fo the city-government. Tens of people from about hundred arrested needed acute lawyer, psychical or material support, which was nobody able to provide for them in that moment. We would like to eliminate this kind of situation in future time and we hope that thanks to us it will be eliminated as much as possible.

## Activity

ABC is an activists project based on anarchists principes. We got finances for lawyer and other support mainly from benefit gigs and actions and allowances from collectives and persons. There are more ways how to help and support ABC. We will really appreciate promo, spreading of materials, publishing on the internet, informations about benefit actions, etc. Most ideal think which you can do is to organize any benefition. We would like to concentrate except the "standart agenda" of ABC for example to creating some documents, organizing exhibitions, thematics lectures..etc.

Project ABC is complex it requires responsibility, it stands on local activities it is on all of us how it will works. The focus group is variety from political activism over involvement art to migrants, activism, social fairness, ecology, gender correctness of females and males, antifascism, human and animal rights, squatting.... All this is one fight. If you get to know about some case or if you fall in to some hard situation, write us email. We will analyze the situation and communicate the eventual process. With increasing fascization of society the ABC will find its necessary place in supporting political prisoners. It is a defiance and we are ready to react!

**Fight back!**
